

## MASI PROFFS MAXI

PRO

ERGO

The Masi Proffs Maxi snow scoop is designed for heavy use. The wide and durable scoop is ideal for clearing large areas as it allows you to move large loads of snow at once. The scoop's sharp metal edge ensures perfect clearing results. The snow scoop's ergonomic Ergo handle ensures a good and comfortable grip. The product is suitable for regular snow clearing and professional use.

The scoop edge is made of wear-resistant Hardox<sup>®</sup> steel that lasts for years. The scoop has a working width of 83cm, which ensures perfect clearing results. The UV-resistant scoop is made of thermoformed high-density polyethylene (HDPE). The scoop is equipped with an external 25mm backboard reinforcement and a carry handle. The Ergo handle ensures a good and comfortable grip, allowing you to whisk away snow quickly and easily. The handle is 22mm in diameter and is equipped with internal 19mm reinforcements.
